

American Institute of Intradermal Cosmetics

***Basic Course:**

Learn the fundamentals of permanent cosmetics. This popular 5-day beginner course is an excellent introduction to the exciting and rewarding career of permanent cosmetics. Physicians, nurses, cosmetologist and many more travel around the world to attend AIIC's Basic Course. This intensive information-packed class includes Blood-Borne Pathogens Certification, Sterilization and Sanitation, Machine Workshop, and 3 days of hands-on training with students performing procedures on live models. Lectures cover health considerations, color selection, starting your business, and tips for beginning technicians. Other topics include consultation basics, communication, marketing and career opportunities.

***Comprehensive Hands-On Clinic:**

An AIIC certified instructor will supervise you as you perform eyebrows, eyeliner and lip color procedures in a small group setting. This two-day clinic is the perfect opportunity for the beginning technician to increase their confidence and quickly launch their career. This Hands On Clinic is also a great refresher course for anyone in the field wanting to enhance their skill level.

***Advance Course:**

Network with technicians from around the world! The AIIC Advance training course is recognized throughout the world as the ultimate educational experience for practicing technicians. This intense three-day course covers advanced techniques, paramedical applications and step-by-step instructions for areola and camouflage procedures. Lectures also include color theory, color correction, tips for eliminating time and touch-ups. Business building and marketing techniques, as well as working with physicians are also popular topics. You will participate in hands-on procedures including tattoo removal, eyeliner (including mucosal), hairline stroke eyebrows and full lip color procedures.

***Trade Tools & Technology:**

The Trade Tools & Technology workshop is designed to give a beginning student a solid, professional education in the tools used to create lasting permanent cosmetics. This course covers assembly, tuning, sterilization and troubleshooting techniques. Learning the technology behind your tools will allow you to perfect procedures, decrease procedure time and eliminate touch ups. This course is great for the beginner or advanced technician looking to find the best "fit" in a pen machine for his or her practice. Highly recommended for beginners. This course includes lecture, manual, demonstration, hands-on training and a certificate.

Basic Eyebrow Design:

This course is a must for any technician who has never had professional eyebrow instruction. Learn techniques that will show you how to design eyebrows that will enhance any face shape. This course will cover how to measure, shape and space the eyebrows. You will also learn how to apply stencils using various techniques. The basic eyebrow design class will help you design beautiful brows. This course includes lecture, manual, demonstration, hands-on training and a certificate.

Microdermabrasion:

The AIIC microdermabrasion certification is designed to educate professionals in mechanical skin exfoliation using state of the art equipment. This cosmetic procedure has become increasingly popular in day spas, doctors' practices and medical spas. This comprehensive course encompasses both theory and hands-on teaching methods. Focus will be on safe and effective treatment plans and maintenance protocols for healthy skin. Client consultation, topical ingredients and post-treatment instructions are discussed during the course. This course includes lecture, manual, demonstration, hands-on training and a certificate.

***Eyelash Extensions:**

This course introduces you to the fastest growing beauty trend in the industry... eyelash extensions. Eyelash extensions eliminate the need for mascara or an eyelash curler; they look astonishingly natural and last up to 2 months. Learn how to disguise short, thinning and missing eyelashes by using the unique lash by lash technique. Topics include touch up procedures, removal and multiple marketing strategies. This course includes lecture, manual, demonstration, hands-on training and a certificate.

Eye Accents:

Learn the latest in updated cosmetic eyeliner that are sure to put you ahead of other technicians in your area. This course is designed to ensure that you are on the cutting edge of eyeliner by offering various unique styles including the new French Eyeliner. Learn how to create beautiful eyeliner using multiple colors that will create a soft, subtle effect that will enhance your client's appearance. This course includes lecture, manual, demonstration, hands-on training and a certificate.

Master Machine Workshop:

An essential course for those technicians wanting to move their practice to a new level, or those who just want to explore the advantages of a more powerful machine. These machines are suitable for tattooing larger areas and thicker skin allowing you to do areola, scar camouflage and body art tattoos quickly and easily. This course will cover the pros and cons of each machine, needle selection, tuning, sterilization and trouble shooting techniques. This course includes lecture, manual, demonstration, hands-on training and a certificate.

Vibrant Lips:

An AIIC certified instructor will teach you new innovative techniques for achieving vibrant lip color in minutes. You will learn the secret techniques to perform beautiful, vibrant, smooth lip color in half the time it takes you today. This class will cover technique, color selection, product knowledge and tips for vibrant lips in minutes. You will not want to miss this fast moving, dynamic, hands-on workshop that is guaranteed to change your lip procedures forever. This course includes lecture, manual, demonstration, hands-on training and a certificate.

Color Correction Clinic:

Do you know how to correct blue lips? Orange eyebrows? Or a distorted eyeliner? You will leave this workshop with the techniques and skills necessary to improve less-than-desirable procedures. Come and learn color theory and color harmony as you study contrast and dominance as well as proportion and intensity. This course includes lecture, manual, demonstration, hands-on training and a certificate.

Descriptions

Basic Body Art:

An AIIC certified instructor will introduce the fundamentals of body art. You will learn all about stencils, how to make and apply them, customize free hand techniques and proper pigment placement. Techniques taught in the Basic Body Art class include: lining, pointillism and several types of shading techniques. You will also learn all about the coil machine: how it works, proper tuning, troubleshooting and needle configurations for lining and shading. This class contains lecture on customer considerations, post procedure instructions, shading, color-blending techniques, healing, scar prevention and more. This fun and exciting two-day class includes lecture, manual, demonstration, hands-on training and a certificate.

Basic Body Piercing:

An AIIC certified instructor will teach the fundamentals of the art of body piercing, the history of various piercing applications, their origins and cultural ties to the past. This class is an intensive course designed to provide individuals with basic skills necessary before undertaking a piercing apprenticeship. It is an introduction to the tools of the piercing profession such as needle preparation, determining appropriate jewelry through knowledge of metallurgy and the piercing to be performed. The class will also cover proper sterilization techniques, infection control strategies, interpersonal skills and problem solving. This course includes lecture, manual, demonstration, hands-on training and a certificate.

Blush:

Most women apply color to their cheeks everyday to give their face a healthy youthful appearance. Imagine how excited they will be to find out that they could have this look all the time. Take this highly intensive course and learn how to perform blush procedures that are designed as a natural enhancement. This course will cover client concerns, color selection and shading techniques that work specifically for contouring cheeks. You will learn everything you need to know to perform blush procedures safely by following the guidelines taught in this course. This course includes lecture, manual, demonstration, hands-on training and certificate.

Eye Shading:

Eye Lights will teach you how to create a soft subtle shade or a dramatic elegant look while creating shadows and highlights on the upper eyelid. Learn the different techniques to accent every shape and size variance bringing out the natural beauty of each client. Lecture will include color selection, color combinations, machine and needle selection. This course includes lecture, demonstration, manual and certificate.
